Objective:
A self-driven and results-oriented Junior Frontend Engineer seeking to leverage my technical skills and passion for web development in a challenging and dynamic environment. Committed to delivering high-quality, user-friendly, and visually appealing websites.

Summary:
An innovative self-taught frontend developer with a talent for creating websites that engage and inspire. Skilled in HTML, CSS, JavaScript, and ReactJS, and able to develop dynamic and responsive web pages with an eye for detail. Adept at collaborating with cross-functional teams and quick to adapt to new technologies.

Technical Skills:
- HTML
- CSS
- JavaScript
- ReactJS
- Git

Unique Skills & Qualities:
- Strong problem-solving skills and attention to detail.
- Excellent written and verbal communication skills.
- Ability to translate complex concepts into simple, user-friendly designs.
- Skilled in working under tight deadlines and in a fast-paced environment.

Projects:
1. Personal Website (https://john-doe.github.io): A portfolio website showcasing my skills and projects. Developed using HTML, CSS, and JavaScript.

2. Online Youtube Clone: A video content platform website that allows users to browse and watch videos. Developed using React, and rapidApi.

3.WeWatermark Landing Page: This Project is a landing page that was made due to client request. It is developed using React and tailwindcss

4. Todo List: A simple application that lists and stores all your tasks in local storage. Developed using React and hooks.

Hobbies & Interests:
- Passionate about web development and coding.
- Active member of online coding communities, such as GitHub and Coding Discord servers.
- Enjoy reading about the latest advancements in frontend technologies and programming.
